AFTERSCHOOL PROGRAMS

GRADES K-6

Live animals from around the world will have your students going WILD! Our Afterschool Program consists of four sessions, each an hour long, that are based on our most popular Zoo programs. Sessions are typically booked once-a-week for four weeks, but are flexible enough to be booked in a manner that meets your needs. Due to the interactive nature of these programs, only 25 students are able to participate in each session. Additional programs can be scheduled for larger groups. To ensure a quality age-appropriate program, please limit groups to a span of three grade levels. The Zoo requires that an adult chaperone from your school be present at each session.

AFTERSCHOOL SESSION TOPICS

It's a Jungle Out There!

Students are invited on a special journey into the world's tropical rainforests. Emphasis is on both the rainforest as a habitat and on what life is like for the animals that live there.

Pennsylvania Pride

This class introduces students to the wonderful variety of wildlife that lives in Pennsylvania. The students will focus on animals found in their own backyards and learn that conservation begins at home.

African Adventures

Discover how the circle of life applies to the creatures that live in the African savanna.

Polar Quest

Discover how polar bears, walruses, and sea otters survive their frigid ocean habitats by exploring their unique adaptations.
